

Working Together to Improve Easton Airport

Join us **Thursday, August 5, 2010** for a public open house and hearing to review and comment on proposed improvements for Easton/Newnam Field Airport. Projects include an extension to Runway 4-22 as well as the construction of an Airport Service Road, construction of aircraft storage facilities, and the removal of obstructions to the existing airspace of Runway 15-33 and Runway 4-22.

In August 2006, the Airport completed a Master Plan Update, as required by the Federal Aviation Administration (FAA), which identified the need and proposed timing of Airport development projects over a twenty-year period. Before proposed projects are eligible for FAA funding, an Environmental Assessment is required to determine whether the actions taken could significantly affect the environment. The proposed projects enhance the Airport's safety and viability to Talbot County by conforming to FAA design standards and improving the Airport's ability to service Easton-based and transient aircraft.

Please read the Draft Environmental Assessment online, or locally at the Airport and the Talbot County Free Library.
